PROFILE

I've spent the last six years building, running and fixing WordPress sites, from small business pages to e-commerce stores. I'm the person who keeps a site loading fast, updated, backed up and looking the way the brand intended, and who can step in and sort out the PHP error or plugin clash when something breaks. I work easily with marketing and design teams and I'm looking for a stable, office-based role in Auckland where I can look after a company's websites long term.

EXPERIENCE

Web Developer (freelance, remote) Aug 2025 – present
Freitag Marketing Agency, USA

- Build, maintain and optimise client WordPress sites, including theme changes, plugin setup and speed improvements.
- Work with Elementor, Divi, Beaver Builder, SiteOrigin and Gutenberg, plus Shopify and Squarespace when a client needs them.
- Handle hosting setup and site migrations, and keep sites stable after launch.
- Diagnose client-reported problems such as PHP errors, plugin conflicts and layout bugs, and write small custom PHP fixes where needed.
- Work with the design and marketing team to turn client briefs into responsive pages that follow SEO and accessibility basics.
- Run a 40-hour week and deliver to deadline.

Senior WordPress Developer Aug 2024 – present
Bengalbyte, Germany (full-time to Aug 2025, now part-time at 15 hrs/week)

- Maintained the company website; online sales rose 25% over the period.
- Introduced a mobile-first approach to design, which lifted mobile traffic by 30%.
- Worked day to day with designers and back-end developers on usability and features.
- Managed code in Git and carried out code reviews.

Web Development Project Manager Jun 2024 – Aug 2024
Website's Farmer, Dhaka

- Led a small team to deliver website projects on time, on scope and on budget.
- Contributed to front-end builds and provided ongoing support and maintenance for live sites.

Software Engineer (WordPress) Mar 2021 – Jan 2024
SELISE, Dhaka (Web unit)

- Built and maintained WordPress sites with Elementor, turning Figma and PSD designs into working front ends.
- Worked on site security improvements and managed servers on Cloudways and AWS.

Software Engineer Sep 2020 – Mar 2021
Olympic Development Ltd, Dhaka

- Built a real-estate company's website in WordPress, including theme customisation and security hardening.
- Maintained AWS servers and handled load balancing; wrote responsive HTML, CSS, PHP and Bootstrap.

IT Executive & Webmaster Oct 2019 – Mar 2020
TravelPro TRS Ltd, Dhaka

- Managed the company's WordPress website and gave general IT support to staff.

Intern, Web Development Apr 2019 – Jul 2019
Sonali Bank Ltd, Dhaka

- Built a travel website using HTML, CSS, Bootstrap 5 and PHP.
